Brilliant puzzle game. The fact that the puzzles have 3 difficulties help a lot aswell!. Hi ... well , we are back to play hoae .. and again not enough players.. the game is dead.. but we are seeing 1-2 people each few days.. lol , awesome... if you wanna play with us, (skilled players) .. let us know.. my skype ofirme19 .. btw FlameMaster is my friend.. he was making a mode Named Rise of Sols. new units and some fixes.. well he can't make that alone.. i don't know what about his mode , but we need a F***** more people.. this his website... <http://hoae.ucoz.net/load/>
we are using gameranger, Tunngle , Steam, and hamachi..... see you :)

. Absolutely amazing game. I really like the deep story and UI plus the design. The game has really deep story. I like it a lot.. Princess Evangile is honestly one of the strongest VN's out there. Whilst it doesn't do anything particularly new, or revolutionary, it does a fantastic job on what it does do. The game itself is split into 26 Chapters, which makes one full playthrough take around 40 hours give or take. I have finished one route in the original, and am in the process of doing another in the Sequel (w/ Happiness).

Now, as someone already has mentioned, if this game appeals to you, pick up the 18+ edition from Manga Gamer directly. I feel that the game itself benefits a lot more from it. w/ Happiness includes the common route for this game, but it doesn't include the actual routes for any of the four heroines in this game. If you are looking to play this, I highly recommend picking both the original and the sequel, and then playing through w/ Happiness's common route. It means you can skip a lot of the game to get directly to the route you want, as with Happiness includes 9 routes instead of this versions 4.

Princess Evangile has Rise, Chiho, Ritsuko, and Ayaka.

Princess Evangile w/ Happiness has a follow up route for those 4 heroines, and new routes for Marika, Mitsuki, Tamie, Ruriko, and Konomi.

Overall, I'd say this VN is definitely the strongest bang for your buck out there, as I can honestly see it taking 300 hours for all of the playthroughs.

My breakdown:

PROS:

- + Art. Moonstone's game's all have beautiful art. Everything here is of superb quality, from the CG's, to the sprites and backgrounds. Not once did I think it was poorly made.
- + Characters. Every character is likeable in their own way, and almost all of them have a sprite and voice acting to go with it.
- + Long. Once again, this thing is really long. I'm not that fast of a reader, and I get distracted a lot, but it is definitely lengthy. Took me well over 50 hours to do Rise's route. For anyone else, this could be anywhere between 35 to 45. Excellent value for money.
- + Voice acting. Full Japanese Voice Acting. Whilst I don't speak the language, I can definitely tell they each did a great job at playing their character.
- + Great dramatic story moments. Whilst some moments were cliché (see the cons), there was some amazingly well done scenes, in particular at the pinnacle of some of the character arcs (Marika in particular). Helped make the experience memorable.

has the stabilisation feature which makes it much easier to aim and hit your target.

A short but challenging point n' click game. More fleshed out than the first game, but also more difficult.

Make sure to play the first in the series, it's even free on the creators website.. Really cute puzzle game with lots of beautiful backdrops, silly robots and epic music.. This seems like it would be the perfect game for me as it is the style and story I love the most. However, I have not been able to actually play it because of one very big down fall (at least big for me). The game controls are made for right handed people and I can't find any way to change them. I'm a very left handed person and playing a game entirely with my right hand is not something I am capable of.. This is an appropriately priced game for casuals and younger folk. It's a bit too simple to excite us experienced gamers.

Took me 90 minutes to beat all levels. Would have been closer to 60 minutes if it didn't crash around five times.. this is an awful mod there are no seleucids no ptolomic empire or antagonids after alexander dies there is only 4or5 factions you can only play as macedon in the campaign there is no rome or anything . Bad game the whole time you are just wild clicking on items to collect. Some items are not seen in the tall grass. There are better games of that concept that do not cost.Real waste of money to buy the game.

The game has 90 levels that are all the same, the maps differ only in that they are different items Collect and the background changes.

Fun factor 0

Frustration factor 10. <https://youtu.be/JADynOEXGaU>

Solving the murder(s) of 'Little Riddle' will require a lot of problem solving skill and a surprising amount of memory acuity. The lack of subtitles for listening problems can be a problem at times.. where the dad is the eraser.

god this game is so drAwful. One of the best "digital" board games on steam. Highly recommend if you like solo boardgames in real life but wished all set up time and rule enforcing and so on would be automated.. game is dead dont waste your money.
